

FOR IMMEDIATE RELEASE

PWRstation™ sweeps through South East Europe and Middle East attending the Solarex Istanbul, the Trade Fair on Energy Efficiency in Sofia and the Solar Middle East in Dubai.

(See us at FILKAB JSCo–PWRstation Booth #___)

Lausanne, Switzerland, March 16, 2015 — Swiss based solar products developer PWRstation sweeps through South East Europe to attend The Solarex in Istanbul, Turkey's leading solar technology innovations trade fair scheduled April 9 – 11, following highly successful showings at the South-East European Exhibition on Energy Efficiency in Sofia, Bulgaria and the Solar Middle East in Dubai.

"We view South-East Europe and the Middle East as exciting dynamic growth markets," says Gianfranco Albertella, PWRstation's Chief Commercial Officer.

At the trade shows, PWRstation is meeting installers and contractors, solar integrators, project developers, engineering firms, commercial builders and utilities representatives at the event who will be coming from around the world.

Albertella says, "These key energy trade shows play an important role for PWRstation as we seek select, regional value added partners who can provide technology, services and support in ways that deliver optimal results on a daily basis. A case in point is FILKAB JSCo, our new strategic distribution partner whom we will be working with to efficiently address the Bulgarian and Turkish markets. They meet our criteria perfectly."

Ognyan Zarev, FILKAB JSCo's CEO says, "PWRstation brings innovative, high performance energy solutions that meet the needs and requirements of our markets, particularly in scenarios where speed to activation and mobility are prerequisites. We have done much research and no solar energy solution defined as "mobile" comes close to PWRstation in terms of performance.

PWRstation designs mass customized, fully integrated, preassembled solar gensets that remove the complexities, time and cost of typical solar installations; bringing economies of scale to a global industry characterized by time and labor intensive custom-built projects.

The company offers several models starting with its 3 kW and 5 kW PWRstation™Genesis line that includes photovoltaic panels, inverters and wiring; engineered to facilitate rapid access to solar, improve safety and drive down costs in grid-tied and off-grid environments.

The company's all-new 50kW and 100kW PWRstation™Oasis line is based on the same engineering principles as the PWRstation™Genesis. The PWRstation™Oasis is the first self-contained, transportable solar solution of this magnitude delivered pre-assembled and ready-to-activate, saving owners and operators money and time.

Unlike fixed installations, PWRstations can be continuously relocated, repurposed for temporary or permanent standalone power generation, or used as a primary or back up source within a hybrid, micro or nanogrid energy environment; bringing its owners unprecedented versatility, flexibility and ROI.

About The Solarex Istanbul

With its more than 230 anticipated exhibitors, this 4th edition of Istanbul's Solarex / Solar Energy & Technologies Fair presents the latest innovations related to solar technologies and creates a learning platform by conducting seminar and conference program.

About The South-East European Exhibition on Energy Efficiency and Renewable Energy

South-East European Exhibition on Energy Efficiency and Renewable Energy in Sofia is a trade show designed to promote the latest energy developments and encourage their large-scale implementation in South-East Europe as well as speed up foreign investment in the regional economy. For more information please visit: <http://viaexpo.com/en/pages/ee-re-exhibition>

About FILKAB JSCo.

FILKAB JSCo. provides engineering and complete design, production, delivery, installation and commissioning of electrical equipment and automation of all types of construction sites, power lines and facilities for the industry, construction and projects with RES.

Clients include companies from the power production, transmission and distribution sectors; the communications, construction, engineering and trade sectors; as well as foreign investors and executors of strategic facilities and sites, Bulgarian SME's, economic and public associations.

FILKAB JSCo. distributes its products, using its wholly owned and operated transport, and attend the needs of its clients via the company's headquarters in Plovdiv, and branch offices in Burgas, Varna, Veliko Turnovo, Ruse, Sliven, Sofia and Shumen.

For more information please visit: <http://www.filkab.com>

About PWRstation

PWRstation is a solar products development company committed to clean, renewable and environmentally sustainable energy that is affordable, easy to access and rapid to activate.

Engineered in Switzerland, PWRstations are mass customized, fully integrated and preassembled solar gensets that remove the complexities, time and cost of typical solar installations; bringing economies of scale to a global industry characterized by time and labor intensive custom-built projects.

PWRstation products are designed to address the growing need for hybrid, microgrid and nanogrid technology, offering a versatile design that integrates with other forms of energy generation including diesel, wind and thermal in both grid-tied and off-grid environments.

Built locally by reputable manufacturers, PWRstation gensets are distributed globally via certified installers and OEM distribution partners.

The company is based in Lausanne, Switzerland, with offices in Biel/Bienne, Switzerland and Miami, Florida. PWRstation is a member of SEIA and Swiss Cleantech.
